

Introduction

Manufactured in the UK from the highest quality materials with HF welded seams for maximum reliability, SeaMarks are manufactured under BS EN ISO 9001:2000 procedures independently certified by Lloyds Register Quality Assurance Ltd. With each unit rigorously tested before despatch, you can be sure of getting a sound product fit for the job.

Features

Each buoy has an inflation valve commonly found in inflatable boats which allows inflation by most dinghy pumps; for the larger versions a small 12v blower or vacuum cleaner set to 'blow' saves a lot of time. A stainless steel ring suitable for shackling to ground tackle is fitted to the underside of the buoy with a similar fitting in the top for lifting or towing.

If required the buoys can be supplied with a banner attachment system that allows a sponsor's message to be fitted that will not come off even when being towed at high speed by a RIB. For more information on the possibilities of Race Officers being able to offer brand exposure to prospective sponsors, please contact Seaflex for information.

SeaMark History

As manufacturers of inflatable structures used extensively in marine / civil engineering and underwater salvage, Seaflex own and operate the world's largest hire stock of air lift bags and heavy duty inflatable buoyancy units.

Being based in Cowes, a major yacht racing centre, local demand has encouraged the production inflatable racing marks. With the benefit of 15 years continuous development, and the company's experienced gained in underwater buoyancy, SeaMarks now represent the most highly refined inflatable racing marks available today.

Being 2.7m tall BigMarks are the most popular model and are easily visible at 2 miles with their bright orange colour clearly defining them from fixed navigation marks. The banner attachment system allows them to be towed fast with no danger of losing the advertising and their ruggedness will accommodate rough handling without damage.

Availability

Seaflex hold a reasonable stock of BigMarks which are the most popular size but potential customers should contact us in plenty of time for items required in the 'busy season'. Printing banners usually take about 4 weeks from receipt of artwork.

SEAMARK Specifications		
TYPE	H (m)	Ø (m)
MiniMark	0.8	0.6
MidiMark	1.5	1.2
BigMark	2.7	1.3
MegaMark	3.0	3.0

Technology, Service and Support

MANUFACTURING TECHNOLOGY

All Seaflex products are designed and manufactured in the UK.

Our bag canopies are constructed from High Tensile Trevira® Polyester base cloth (either 2 / 2 or 3 / 3 fibre panama pattern weave) coated with heavy duty UV stabilised PVC coating or, for special applications, polyurethane. Trevira is incredibly strong; a 50 mm wide 3/3 strip has a break load of approximately 1 tonne.

The panels for our bags are precision cut on our 15 metre long, 3 metre wide advanced automated table for perfect repeatability. Once inspected and approved panels are assembled by skilled personnel to using Radio Frequency welding to strict quality control standards.

CERTIFICATION

All our work is carried out within a system which complies with the ISO 9001-2009 Quality Management Standard as audited by Lloyds Register Quality Assurance for full traceability – and we have now gained ISO 14001 and ISO 18001 accreditation.

SERVICE

Whether for hire or sale, all Seaflex products are sent out fully tested and inspected against their build criteria. And we do also offer on-site support to our clients in the use of our products – this most often happens within the more complex buoyancy applications for our products.

In the event that your Seaflex product should suffer minor damage in service, we can supply an approved, boxed field service kit comprising of patches, a professional quality heat gun and instruction manual to make good minor leaks prior to product refurbishment.

We can also advise on the viability of carrying out more extensive repairs, which would typically be undertaken either at our factory or at one of our approved service centres.

SUPPORT

Our support philosophy is “Wherever, Whenever”. This underlines the Seaflex commitment to not just sending out tested, proven products in proper shipping crates and with the most comprehensive documentation package in the business – but to assisting our customers in every way possible throughout their time using our products, whether the job is a hire project or an equipment sale.

We offer worldwide support to our customers via either email or phone from head office in the UK and via our ever-growing network of offices and partners around the world.

You can put your trust in Seaflex – we won't let you down.

Our Philosophy

Whenever, Wherever

We have a simple philosophy here at Seaflex: we will do everything within our power to deliver what our customers need from us, whenever they need it and wherever they need it.

That simple philosophy is born of several different levels of understanding:

- An expert understanding of how to design, manufacture, prove, deliver and support best-in-class bags for ballast or buoyancy.
- An in-depth understanding of the regulatory environments in which we and our clients operate – both onshore and offshore.
- The desire to understand our clients' businesses, and to work with them to achieve the best possible technical and financial outcome for them.

We are not complacent: we are only where we are due to our ability to keep our band of loyal customers happy, whilst adding to them by demonstrating to others the value which we can bring to their businesses. If we let that slip then we are nowhere. And that is why we keep investing in our business: to better serve your business. Hence the brand new factory capable of producing 3,500 tons of lift and water load testing capacity each and every month. And hence us holding and managing the largest global rental fleet of buoyancy and ballast bags.

As you continue to invest in us, we'll continue to invest in you. We are always happy to hear from customers new and old alike as to how we may better serve you. We will travel the world to meet with you at your convenience, and the doors of our factory are always open and the kettle is always on for visits from those who would like to see what we do, and how we do it, for themselves.
